

NEW ALBUM OUT NOW!

BIO AND BACKGROUND:

TOP SECRET EYES ONLY

Agent 51 is a legendary punk band from San Diego with deep roots in the same scene that launched Blink-182 and Unwritten Law. With a sound blending high-octane punk and sci-fi storytelling, the band caught the attention of Green Day's Billie Joe Armstrong, who signed them to Adeline Records for their breakout album *Just Keep Runnin'*.

Their latest release, *Age of Validation*, continues their legacy with a modern update. The single "Eastern Street Kids" is now spinning on 91X San Diego, featured on major playlists like Spotify's All New Punk and Apple Music's Best New Rock.

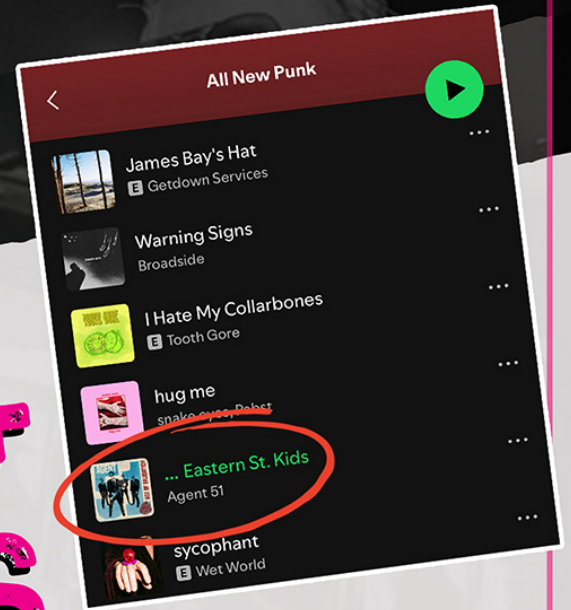

Fresh off a West Coast tour with Unwritten Law, Agent 51 has recently shared stages with TSOL, Strung Out, Pulley, and more. The band is back and the mission is far from over..
